INTUITIVE
INTERFACE

OVERVIEW

HMJ tech's A200 is the most affordable, industrial-grade dispenser available, but don't be fooled. Despite its compact size and affordable price tag, the A200 has a ton of big-machine features including fully-automated cleaning and single point dispense.

It arrives fully assembled and configured on a single crate. Simply connect the utilities, add your source containers, load your recipe book and start dispensing batches.

The on-board inventory system conveniently arranges 12 pails, plus it can accommodate two drums or totes behind the frame for high-use ingredients. (other configurations possible)

The A200 uses a 2-range+pulse valve for a perfect combination of speed and precision with clean, laminar flow and predictable dispenses every time!

The touch screen interface is easy to navigate and comes complete with the industry's best features for easy dispensing, recipe book management, inventory management and reporting.

The A200 is ideal for small and niche clients looking to exploit the advantages of in-house batching. If you are still buying pre-mixed inks, coatings or chemicals, it is time to explore how the A200 can improve your bottom line.
