

DISPENSING SYSTEMS FOR LUBRICANTS & ADDITIVES

*Need to create customized blends of
LUBRICANTS and ADDITIVES?*

HMJ tech has you covered.

Over the last decade, HMJ tech has built an **innovative product line** that has set us apart from the competition. Here are some of the key ways that we deliver **productivity and profitability** to your firm:

- We manufacture our own proprietary valves for **optimum dispensing speed, precision and reliability**. (Up to 53L/m)
- We use only **industrial solid-state controllers**, instead of the competition's consumer-grade personal computers.
- Our proprietary software is designed and managed in house for **unlimited adaptability**. We do not use third-party developers.
- Our **real-time control** methodology takes priority command of the CPU. This eliminates the common problem of resource sharing associated with Windows driven programs. Our approach allows for **industry-leading speed in dispensing without sacrificing accuracy**.
- Our valves and control algorithm are designed to work together to achieve **perfect laminar flow** through all ranges, while eliminating common industry problems including splashing, over-dispensing and low-flow timeouts.
- Our system **accommodates a wide range of viscosities** and easily integrates with several types of source pumps or bulk lines.
- Visit us at www.HMJtech.com for full specifications and options for all of our dispensing and mixing machinery.

Key Capabilities...

- **Dispense Lubricants & Additives**
- **Highly Customizable Modular Design**
- **Retrofit to your Existing Operation**
- **Integrate with Plant DCS & ERP Systems**
- **Dispense from Containers or Bulk Lines**
- **Remote Support Available Globally**
